

21st Century Learning

What does the future hold?

‘ I am entirely certain that twenty years from now we will look back at education as it is practiced in most schools today and wonder how we could tolerated anything so primitive.’ John W Gardner 1968

Where are we heading?

- 21st Century Education
- Did You Know 3.0

What Does This Mean Now?

➤ NAPLAN On-Line

- ❖ From 2017 all students will potentially be using an internet enabled device to complete NAPLAN testing.
- ❖ This may be in the form of a desktop computer, laptop, notebook or chrome book, iPad, Windows Surface Pro 3 or other such device.
- ❖ This means that our students will need to be proficient in using a multitude of devices running different operating systems and environments.
- ❖ For students to become proficient and confident users in 2017, they need to start using, interacting, engaging with and learning on these devices now. 2017 is to late to start.

Impact for Wandina Primary School

- Wandina PS has been selected as one of 36 NAPLAN On-Line trial schools across WA.
- The Department of Education is providing us with 31 enabled devices for us to start trialling NAPLAN testing in August 2015 with our Year 3 students.
- Technology and ICT will have to be seamlessly embedded in general classroom practices. We can no longer ignore the hype and visioning, we need to grasp this opportunity and use it to help our students become engaged thinkers and ethical citizens with an entrepreneurial spirit.

What Next?
